

Interchangeable Mount System (IMS) for RED One

Key Features

- ➔ Easy modification to the camera
- ➔ Ease-of-use change of lens mounting rings
- ➔ More than eight lens mounts available
- ➔ Makes a wide range of lenses available

The Interchangeable Mount System (IMS) consist of an intermediate flange and lens mounting rings to use hundreds of film and still photography lenses.

To implement the IMS on the RED One, the original RED mount needs to be replaced by the P+S Technik IMS mount, no modification to the camera housing has to be done and no cables need to be cut. If needed the IMS can also be re-exchanged with the original RED One mount, if you do not cut the /i link cable.

The following lens mounts can be used with the P+S Technik Interchangeable Mount System on the RED One camera:

- PL-Mount
- Panavision Mount
- BNC-R Mount
- Professional F-Mount
- Nikon F-Mount
- Canon EF-Mount
- Canon FD-Mount
- Leica-R Mount and Leica-M Mount.
