

MeVis 2K Lens Set & Lens Gear Kit

P+S Technik offers the high quality MeVis C-mount lens set, manufactured by German lens manufacturer LINOS. Together with the lens accessory kit the lenses are prepared to be used with cine and video lens accessories. The 12 mm and 16 mm are designed for 2/3" sensor size, the 25, 35 and 50 mm lenses can project onto a 1" sensor with lossless quality up to the edges. These lenses work especially well for 3D stereo recording with the SI-2K Digital Cinema Camera.

Equipped with lens accessory kit, the lenses mount directly to the P+S Technik Interchangeable Mount System (IMS) and focus and iris ring covered with gear rings. This means that follow focus and electronic lens control systems can be used with these lenses.

The IMS consists of an intermediate positive lock mount on camera side and various lens mount adapters. All P+S Technik camera products are equipped with this Interchangeable Mount System (IMS) which allows the fast exchange of different lens mounting rings.

Order Information

Art. No. Description
