

LEICA-R LENS REHOUSING

FULL FRAME CINE LENSES

P+S TECHNIK
Optics for Exceptional Images

The name "Leica" is closely linked to the beginning of film making. Leica lenses are iconic for photographers. The 24x36 Leitz/Leica format was developed from the silent movie format. The digital cinematography broke the limits and a mix of different sensor sizes can be a stylistic element. The "Full Frame" format 24x36 as sensor size is available and affordable. Several focal lengths even cover RED 8K format.

P+S Technik offers a rehousing for Leitz/Leica-R still photography lenses including a new focus- and iris mechanism, gear rings and PL Mount to allow the use of today's lens control and accessories.

Rehousing is available for Summilux-R, Summicron-R and most Elmarit-R lenses.
