

PS-ZOOM 35-70 CS

CINESCOPE ZOOM LENS

P+S TECHNIK
Optics for Exceptional Images

Perfect for widescreen image capture on full frame, VistaVision and 16:9 sensors. A lightweight lens for UltraHD production on Arri Alexa 4:3. It offers anamorphic qualities, such as barrel distortion, nicely formed flares and shallow depth-of-field. It's not only a creative on-set tool; an additional benefit is the freedom to re-frame the best part of a scene in post production.

The P+S Technik CS zoom lens series convinces by outstanding optical performance compared to the higher priced lenses. They cover Vista Vision format (36 x 18mm) and are a future-proof investment.

These zooms extremely expand your options for daily picture work. You may choose it for its special anamorphic look or for more creative freedom in post production - the CS zoom series offer the right tool for the job.
